Community Data Program
CCSD's Flagship initiative

Schedule B, 2016-2017

This Schedule B lists data products that the CCSD Community Data Program intends to acquire during the 2016-2017 program year. Program years run from April 1 to March 31.

Schedule B contains a list of data products—including both data tables and analytical tools—as well as the names of data providers, a summary of available geographies, and the data delivery schedule.

If you notice any errors, omissions, or out-of-date hyperlinks, **please notify us**.

Making data available takes time

Note that making data available takes time. While certain products will be available within weeks of purchase, the special/custom orders from Statistics Canada and other providers may take up to 12 months for delivery.

Schedule B is updated regularly

This document is amended regularly, subject to the availability and cost of data. Priorities for data product acquisition are identified by the Data Access and Purchase Working Group with input from Leads and are approved by the Community Data Program Steering Committee, using a decision making process consistent with the Community Data Program *Governance Structure and Operating Procedures* (communitydata.ca/resources). If you have questions about this process, please speak to your local Consortium Lead or to the **Community Data Program Team**.

Geographies

All tables by all available sub-provincial geographies, plus P/T and Canada

Schedule B, 2016-2017 – Appendix 2

Taxfiler (T1FF) - Custom geography - Census Subdivision

The following tables will be ordered at the Census Subdivision geographic level:

- Family Table 18, After-tax low income
- Family Table 1, Summary Table
- Family Table 6, Sources of income
- Seniors Table 5, Sources of income of senior individuals by age group
- Neighbourhood Income and Demographics Table 5, Taxfilers and dependents with income by total income, sex and age group

Budget permitting, more tables may be added to this order.

Schedule B, 2016-2017 – Appendix 3

Custom geographies for standard T1FF tables

We will collect custom geographies, typically in the form of shapefiles, from consortium members throughout the Summer of 2016 and into the Fall. Statistics Canada is working on a cost and time estimate to geocode all of the custom geographies currently on file for the Community Data Program. When this first batch of custom geographies has been geocoded to Postal Geography, we will proceed with an order of selected T1FF data tables using these geographies.

Several consortia will not have their custom geographies geocoded before the first data order is submitted. We will continue to collect custom geographies for Statistics Canada to geocode and then submit subsequent orders in batches. CDP members have the option to submit their custom geographies directly to Statistics Canada for geocoding and the Community Data Program will reimburse the geocoding costs.

We estimate that the program can afford to purchase 5 to 10 tables. The Data Purchase and Access Working Group will determine which standard tables to order at these custom geographies. A discussion of this issue is featured in the notes of the **2016 Annual Meeting**.

Schedule B, 2016-2017 – Appendix 4

Taxfiler (T1FF) - Custom tabulations

We are getting a cost estimate from Statistics Canada to produce the following custom tabulations:

Table F-1

Add median income for Couple families with children (0-17).

Table F-18

Add the following age groups:

- 0-6
- 0-12
- 0-17
- 18-24
- 25-29
- 55-65
- 65+
- 65-74
- 75+

- Add Families with children aged 0-17 (i.e., Couple Families with 0, 1, 2, 3+ children aged 0-17; Lone parent families with 0, 1, 2, 3+ children aged 0-17, etc.).
- Separate male and female lone-parent families.
- Separate male and female population aged 65+.

Table F-6

Separate the Guaranteed Income Supplement from Old Age Security payments. (or break down further)

Table N-5 (A, B, C)

Add a $1,000,000+ income category.
